Maritime Business Undergraduate Programme at UPIC (First Year Entry)

As part of the UPIC Maritime Business degree, students develop a range of skills valued by employers such as communication, teamwork, presentations and time management. The programme has a strong contemporary feel and relates maritime business theories and concepts to the practical issues facing maritime business managers in the 21st Century. Successful completion of the degree can lead to career opportunities in marketing, enterprise, maritime business operations, shipping, logistics, recruitment consulting and other graduate level jobs.

In the First Year of the programme you will take the following core modules, four in the first semester and four in the second.

In Semester One you will study:

- Interactive Learning Skills and Communication
- Principles of Economics
- Business Foundations
- Principles of ICT

In Semester Two you will study:

- Business Law
- Organisational Behaviour and Leadership
- Introduction to Logistics
- Introduction to Shipping

Module Overview

Interactive Learning Skills and Communication

This module aims to help students to develop their Academic English, Study Skills, Research, Critical Reasoning skills in order to be successful undergraduate students; a subsidiary aim of this module is to ensure that students develop the skills, dispositions and ability to function independently and take responsibility for their personal, academic and professional development

Business Foundations

This module aims to provide knowledge of the economic, environmental, cultural, ethical, legal and regulatory, political, sociological, digital and technological aspects that influence business and management. It gives understanding of the above influences at local, national and global levels. It also provides understanding of how the above can impact upon the strategy, behaviour, management.

Introduction to Marketing

This module provides a broad overview of marketing theories and models whilst introducing the student to a market orientated approach to the solution of organisational problems.

Principles of ICT

This module will deliver an accurate snapshot of the state of ICT as it exists currently, as well as to equip the student with a useful set of skills in the use of common productivity software and Internet based applications.

Principles of Economics and Finance

This module provides an introduction to core principles of both economics and finance (if applicable to the cohort). It explores some basic concepts and techniques involved in economic and financial analysis at an introductory level and considers the relevance of economics and finance to broad areas such as business decision-making and risk management.

Organisational Behaviour and Leadership

This modules encompasses the internal aspects, functions and processes of organisations, including their diverse nature, purposes, structures, size/scale, governance, operations and management, together with the individual and corporate behaviours and cultures which exist within and between different organisations whilst also introduces you to the practices of the manager and leader, exploring the key attributes, roles, responsibilities and challenges facing them in 21st century organisations, and the attributes, skills and competencies required to be effective.

Introduction to Logistics

This module introduces concepts relevant to the study of logistics within the context of supply chain management and introduces elements of freight transport systems.

Introduction to Shipping

The aims of the Module are to provide a broad overview of the international shipping industry and give specific knowledge to the student about the design, building and structure of specific ship types.
